

Making STEM Learning More Accessible

Stephen Cotton

Stephen Cotton is the Instructional Design Coordinator at the Clemson University Center for Workforce Development. In this role, he is responsible for creating and managing instructional design and supporting development and dissemination of online material. Part of these duties include STEM workshops with K12 teachers and outreach efforts that engage middle and high school students in selecting STEM career pathways. Stephen is an experienced presenter, teacher, and instructional designer with 15 years of K-12 teaching experience across multiple grade levels and content areas. Previously, Stephen coordinated a program at the University of Virginia called My History Partner (MHP), which used digital media to improve history teaching quality and increase student engagement. Prior to joining CUCWD, Stephen used his experience to create STEM education workshops and support online course development at Clemson Online.
