Setting Your Students Up for Successful Argumentation

Eileen Patrick

Eileen Patrick was an elementary educator in the Adams 12 school district just north of Denver for 20 years. During that time, she was a classroom teacher, technology specialist and instructional coach. She was the fourth-grade teacher hired when Adams 12 launched their first STEM school –STEM Lab School. Her passion is the intersection of science and literacy, supporting all students in both content and language. Currently, she is the FOSS science regional manager for a multi-state territory, helping districts, schools and teachers bring powerful and engaging science to their students.

Gwen Warniment

Gwen is the K-12 Program Director at the LANL Foundation. In this position, she oversees the Inquiry Science Education Consortium, as well as potential education partnerships, initiatives, and advocacy in New Mexico. With over 18 years in education, Gwen’s career includes teaching across the elementary to postsecondary landscape, coaching, and facilitating professional development for educators and communities of practice. She is currently a doctoral candidate in science education at New Mexico State University. A strong advocate for equity, social justice, and self-determination through public education, Gwen finds a particular nexus among language, identity, and STEAM education
