Teresa Phillips, M.Ed, is an educational consultant who is currently working with the SSEC to support STEM education for English Learners in the Denver area. She previously worked for over twenty years in the Houston Independent School District where she served as a teacher, professional development specialist, director of science professional development and manager of elementary science curriculum and instruction. She has extensive experience teaching in grades pre-kindergarten through eighth grade and has taught in schools in Mexico, California and Texas; the majority of those years as a bilingual teacher. She is a member of several professional organizations including the National Science Teachers Association and has presented workshops at national, state and local conferences. She received her B.A. in Biology and Environmental Studies from the University of California at Santa Cruz and her M.Ed. in Curriculum and Instruction from the University of Houston. She attended her first Strategic Planning Institute in 2008, has served as faculty at subsequent institutes, and never tires of watching participants' eyes light up as they engage in active learning.
